WHY THE COALITION?

Strong, united leadership is needed to galvanize a successful movement to halt the pornification of our society. A coalition is better equipped to serve the men, women and children whose lives are touched by the devastation brought on by pornography and other forms of sexual exploitation. Many groups around the country address various aspects of this fight. However, work and resources are often duplicated and groups are unaware of what others are doing. With a united coalition, groups can share resources, learn from one another, and provide better support to individuals seeking help. An official coalition improves the effectiveness of each group in this fight.

As of February 2014, 145 national, state, and local organizations belong to the coalition.

MEMBERS OF THE COALITION INCLUDE:

- profamily organizations
- women’s rights and feminist activists
- child advocacy
- Internet safety groups
- law enforcement
- mental health and science experts
- anti-trafficking groups
- state policy groups
- religious leaders
- medical professionals
- scholars
- and more

MISSION AND VISION:

Morality In Media exists to make society aware of the many harms of pornography; to equip individuals and families to overcome or protect against those harms; and to advocate that all laws defending the right to be free from pornography are vigorously enforced.

Filters are faulty. Policy lacks sufficient power. How can youth achieve success in school, prepare for careers, and have healthy & safe lives?

Collective Impact-
A new approach to an old problem.

No organization can do it alone. And since all of us have pieces of the answer, the time is now to come together with business, government and education to discover lasting solutions to empower our youth. The next generation needs us to lead the way in celebrating this digital day and believing in their power to self-regulate.
