Sex Doll and Child Sex Abuse Dolls

After years of pressure from NCOSE's army of advocates and from Congress with the 2018 House-passed and then 2020 reintroduced Creeper Act, Amazon seems to have finally caved and removed all full-body and childlike sex dolls from their marketplace.

Searches in September 2020 still returned what seemed like thousands of full-body sex dolls on Amazon Marketplace. However, after mounting pressure, NCOSE researchers have discovered in January 2021, that only disembodied sex dolls remain. These are dolls with only the torso and thighs.

While these are still highly problematic, continuing to reduce women to only their intimate parts, this is a step forward.

Half body or torso-only sex dolls still sold by Amazon in Jan 2021:

Clearly, these dolls are portraying people (typically women or children) as literal sex objects, which contributes to coarsened social respect for women or values of consent. As Dr. Maras and Dr. Shapiro note in the *Journal of Internet Law*, sex dolls “have the potential of altering individuals’ views and perceptions of relationships, ultimately, having them interact with humans as they would with the dolls and robots.”
Screenshots Retrieved January 13, 2021 show that Amazon's algorithms for the search term "sex doll" return suggestions for what is likely meant to be just toy baby dolls, but the dolls recommended have anatomically correct body parts. Amazon must fix its algorithms to ensure silicone infant dolls with "realistic genitals" are not showing up.
