PROTECT SURVIVORS

There are no independent studies that show that normalizing the sex trade by decriminalizing or legalizing it makes it safer.

In fact, as demonstrated by an academic study of 150 countries led by the London School of Economics, wherever prostitution is legalized or legitimized there is an increase in sex trafficking.

2. Men who don’t buy sex when it is illegal start to buy sex when it’s legal.

3. To satisfy demand, the sex trade has to lure in vulnerable people because there aren’t enough willing people.
