

# WARNING: NCOSE ADDED CENSOR BARS TO THESE IMAGES TO BLOCK OUT EXPLICIT GENITALIA AND BREASTS, BUT THE IMAGES ARE STILL HIGHLY SEXUAL.

Steam has currently updated this game so there are censor bars over the nudity, but the premise of the game and its themes of coercion women into sex via intoxication, blackmail, and deception are still intact.

The online videogame store Steam has come under fire from thousands of individuals for hosting the game House Party, which features animated pornography and manipulation of women into sex through blackmail, intoxication, and deception.

As we learned from the infamous case of Brock Turner, where alcohol was used to assist in the rape of a young woman, it is vitally necessary to combat the rape myths that such activities have no consequences or harms.

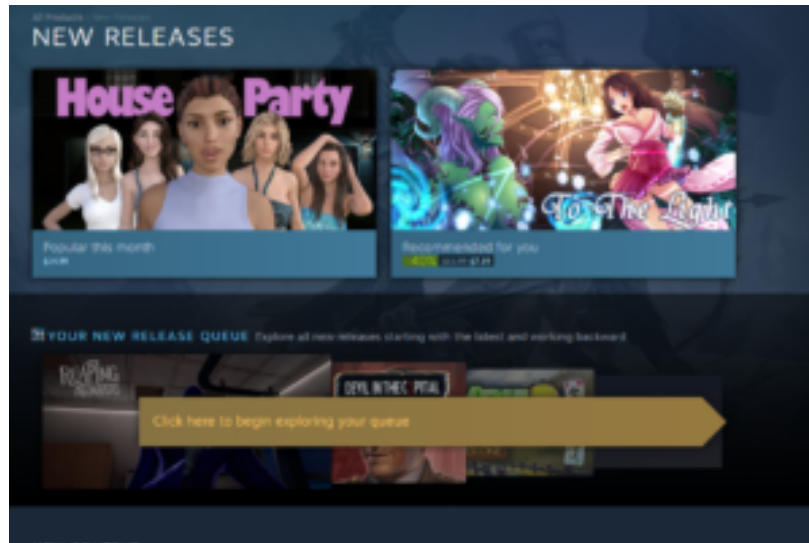

After the game was briefly removed for edits, the game has been brought back onto Steam's online store, and the developers of the House Party videogame have stated that "the entire story of the game is 100 percent in-tact... and there have been no changes made to the content of the game."

The only edit to the game is that the sex acts have been partially blocked with black bars. Yet there are already several "un-censor patch" add-ons that other developers are promoting so people can remove the black bars and play the game with full pornographic nudity.

This is not a solution.

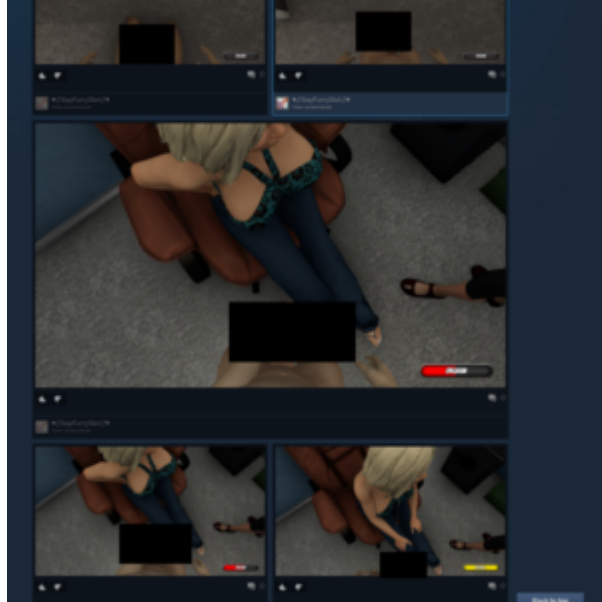

The entire theme of the House Party game is to normalize and instruct its users **as a virtual how-to manual of sex crimes and misogyny.**

# HOUSE PARTY GAME

The pornographic House Party game is promoted to users of all ages on the Steam website.

Users also have the option to masturbate on other characters. Image of male genitalia covered by NCOSE's censor bar.
