**The Female Libido, Unzipped. (cover story)**

Authors: Grumman Bender, Rachel  
Source: Women's Health, Oct2015, Vol. 12 Issue 8, p117-122, 4p, 8 Color Photographs  
Document Type: Article  
Subject Terms: Human sexuality, Sexual lubricants, Pelvic pain, Anxiety, Respiration  
Abstract: The article discusses how to improve a woman's libido and sex drive. Topics covered include the myth that women could lose their sex drive if they do not use it regularly. Also mentioned is the idea that sweat acts as a natural lubricant and information on several arousal disrupters such as pelvic pain, stress and deep breathing.

Sex Secrets  
Love + life  
It's the zap that ignites your naughty thoughts, sends pleasure waves to your lady parts, and makes you want to ride your man like a carousel horse. Yes, sexual arousal is an amazing process—if it works. Too bad the top bedroom complaint among women is the lack of it, and the anxiety that creates, which has scientists (and drug companies) finally stepping in to figure out why.  
On August 10, a week after their issue goes to print, the FDA will have voted on Filibanserin, the first-ever female sex drive drug, which could open the door for future treatments, says Leah Millheiser, M.D., director of the female sexual medicine program at Stanford Health Care. No matter the outcome, it's time you joined the convo. Sex Ed is now in session.  
I see sex everywhere—even in furry designer purses  
Lesson One: GET ON THE HORNY HIGHWAY!  
Imagine your libido as a car with two conflicting pedals, says Emily Nagoski, Ph.D., director of wellness education at Smith College and author of *Come As You Are: There's the sexual excitement system (SES) that ignites your arousal, and the sexual inhibition system (SIS) that either slows it down or completely shuts it off. Both function simultaneously in our brains, according to Nagoski, but in some women (due to hormones, genetics, or other factors), one side is stronger than the other, making it much easier or harder to get—and stay—homed up. But even if your SES hits a couple of speed bumps, you can still reach your destination. You just need to be patient, refocus, and—we can't underscore this enough—keep going.Start  
Your partner gives you a sexy look that says, "You. Me. Upstairs."  
He starts kissing and undressing you... slowly. God, so good.  
Shoo! You suddenly realize you forgot to put the milk back in the fridge.*
